(b)
(v)(b)
1 27. (Newly Added) In a health monitoring system including a plurality
2 of differing measuring devices, each measuring a health parameter of a patient and
3 displaying a health parameter value on a display, a method of recording the health
4 parameter value from each measuring device comprising the steps of:

- 5 (a) identifying each respective measuring device;
- 6 (b) scanning a display of the measuring device identified in step
7 (a) to extract a health parameter value displayed on the display; and
- 8 (c) inputting the health parameter value extracted in step (b) to a
9 data collection terminal.

1 28. (Newly Added) The monitoring system of claim 27 wherein step (a)
2 includes forming a marker on the display and identifying the respective measuring
3 device by scanning the marker.
